

Benefits to being KEYLESS!

Self Showings

Unique codes can be generated for showings, tenants, vendors, and property managers.

Tenant Lockouts

Make sure you leave the one-sided deadbolt unlocked on the door you would like to access the property from when you arrive home.

Not having a key cuts down on accidentally locking yourself out of the house.

Tenant Holdovers

You are able to program 5 codes within your tenant ShowMojo app. These codes are only valid during the terms of your lease. If you need to stay a few days past your lease term, you will need to contact us. We will be able to edit your access days for your keyless system and set up payment for the days you will continue needing access to the property.

Maintenance

If you are comfortable with a preferred/vetted vendor entering the property without being present, then we can give the vendor a one-time access code. This will cut down on maintenance repair time.

Security

At no point will losing your keys become a home security issue for you. You are in control of the codes that provide access to the property. Do you have kids that ride the bus? They will no longer have to keep up with a key to get home.

You can also generate one-time code for cleaning company or anyone needing to drop by and pick something up from your home.
